REVISED

Outdoor Water Restrictions for Narragansett and South Kingstown (United Water and Town) Water Customers

In anticipation of typical summertime heavy consumer demand, United Water- Rhode Island, and the Towns of South Kingstown and Narragansett have announced restrictions on outdoor water use for the following water system customers:

- United Water- Rhode Island water system customers
- Town of South Kingstown South Shore and Middlebridge water system customers
- Town of Narragansett water system customers

Effective immediately, each water utility is imposing an outdoor water use ban on alternate odd and even days. Customers with an odd number street address may water only on odd number weekdays, while customers with an even number street address may water only on even number weekdays.

This watering restriction is being enacted to ensure sufficient supply to meet customer needs. In addition, water customers are encouraged to use water wisely.
