## **Lawn Damage Due to Snow Plowing**

It is the policy of this department to address any lawn damage caused by snow plowing.

Once the snow has melted, we will evaluate each plow route. The department will reset any large lawn damage and remove small debris as needed.

To help prevent damage, we kindly encourage residents to place snow stakes along the edge of their lawns. This will assist our team in identifying the road edge and minimizing any potential impact during snow removal operations.

Thank you for your cooperation and understanding.
